

TURBOLAB Launch Offer

All-new smart high vacuum systems for researchers

SPECIAL INTRODUCTORY
DISCOUNT
**SAVE
UP TO 45%**
UNTIL 3/31/2017

TURBOLAB are plug-and-play high vacuum pump systems based on well-proven components. Different configurations cover individual vacuum demands. Our TURBOLAB comes completely preassembled with turbomolecular pump, backing pump and the innovative TPU display power unit. The basic TURBOLAB can be upgraded with up to six accessories and two gauges.

TURBOLAB with DIVAC diaphragm pumps are mounted in a tabletop frame. TURBOLAB with SCROLLVAC scroll pumps are mounted in a mobile cart.

Highlights

- Engineering basics
- Enhanced pump performance
- Compact mobile design
- Small footprint
- Easy to relocate pumps out and away from the frame
- Backlight display (control/monitoring/configuration)
- Monitored data are automatically stored to a data log file in the TURBOLAB. Users can easily view the log file with the TURBOLAB data viewer software tool or via the data viewer in the web server
- Covering more applications with a full range of high vacuum and dry or wet forevacuum pumps
- Features dedicated ports for the connection of six different accessories and two gauges
- Benchmark functionality, reliability and design
- Excellent price-to-performance ratio
