

LACO TECHNOLOGIES

HELIUM SNIFFER PROBES

LACO's line of Helium Sniffer Probes are the ideal accessory designed for use with popular helium mass spectrometer leak detectors. The various models are easily connected to your leak detector's sniffer or inlet port. Connect LACO's helium sniffer probe and your leak detector is ready for sniff leak testing.

T2003

SPECIFICATIONS

- Achieves sensitivities to 1×10^{-7} atm-cc/sec
- Male connector for quick connect/disconnect (QD)
- T series - Rectus quick disconnect. Enhanced sniffer probes with pass/fail + zero function. Compatible with LACO's TitanTest™, Inficon's Modul 1000, LDS3000, UL1000 Fab, UL5000, and Pfeiffer's ASM340 leak detectors.
- A series - Stäubli-quick disconnect. Compatible with all Alcatel/Adixen leak detectors including ASM 142, ASM 180T, ASM 182T and ASM340
- N series - Rectus quick disconnect. Compatible with LACO's TitanTest™, Inficon's Modul 1000, LDS3000, UL1000 Fab, UL5000, and Pfeiffer's ASM340 leak detectors.
- HS-115 series - Compatible with Varian brand leak detectors
- HS-NW series - compatible with leak detectors using NW fittings at inlet port, such as Oerlikon/Leybold Phoenix L300i, L300i DRY, L300i Modul, L320i Fab, L340i, L500i. Designed for gross mode inlet pressures at 0.1 Torr and above.
- Includes spare filter tip assembly, and portable storage case
- Hose extensions also available
